

Web & Mobile Development Track

(5 Months)

Learning Pillar	What's Covered	What You'll Be Able To Do
Web	Web Fundamentals	Understand how the web works and how modern websites are structured
	Web Development	Build functional, responsive websites and web applications
	React, Next.js	Build fast, interactive user interfaces and modern web apps
Mobile	Mobile Development	Understand how mobile apps are designed, built, and shipped
	Android, Kotlin	Build Android apps and understand native Android development concepts
Deployment	Flutter (Dart), React Native	Build mobile apps that work across Android and iOS using shared codebases
	iOS, Swift	Understand iOS app development and native iOS development concepts
Deployment	Web App Deployment, Mobile App Release	Deploy web apps reliably and publish mobile apps using sustainable release practices (versioning, environment setup, and maintainable delivery workflows)
